

HEARING LOOPS IN THE NEW YORK CITY METROPOLITAN AREA

As of 30 June 2016

The following institutions have hearing loops installed. Most only have hearing loops in limited areas of the building.

Hearing looped venues are listed by county and by type of facility:

NEW YORK STATE

New York City

Public Facilities

IDNYC

All IDNYC enrollment centers are equipped with hearing loops to ensure accessibility for hard of hearing applicants.

Locations are listed at <http://www1.nyc.gov/site/idnyc/card/locations.page> .

Website <http://www1.nyc.gov/site/idnyc/index.page> .

MTA subway system station booths

http://web.mta.info/accessibility/station_booths.htm

All subway information booths in stations in the Bronx, Brooklyn, Manhattan and Queens are looped.

MTA subway system Help Points

http://web.mta.info/accessibility/station_booths.htm

The upper portion of the Help Point is a bright blue light and the lower portion is silver with two buttons: one marked “emergency” and the other marked “information.” By pushing the appropriate button, subway riders are able to remotely connect with a person who can give directions to another subway station or send help in an emergency. Help Points are generally attached to a support column or a wall and are easily located by the bright blue light.

All Help Points are installed with hearing loops; simply set your hearing aid to the t-coil setting, press the appropriate button on the Help Point and wait for the operator to speak to you.

New York City Taxi and Limousine Commission, Taxi of Tomorrow

http://www.nyc.gov/html/media/totweb/taxioftomorrow_home.html

Beginning 1 September 2015, New York City will require taxi owners who are replacing yellow taxis to replace them with vehicles that meet the new standards for accessibility, including hearing loops. It will take several years until all vehicles have hearing loops. Customers should look for the hearing loop logo on the outside of the cab.

The new rule only applies to yellow taxis. It does not apply to green outer borough taxis, although if the owners buy the Nissan MV200s, those cars will have a loop; nor do the new standards apply to black cars, or car service vehicles or services such as Uber and Lyft.

Bronx

Public Facilities

Bronx Zoo

2300 Southern Blvd

Bronx, NY 10460

718-367-1010 general information

718-220-5103 guest relations

<http://bronxzoo.com/visitor-info/accessibility>

There are hearing loops at the Congo Gorilla Forest and, during feeding times, at the Sea Lion exhibit

The New York Botanical Garden

2900 Southern Boulevard

Bronx, NY 10458

718-817-8649

<http://www.nybg.org/visit/accessibility.php>

Ticket windows have hearing loops. Tram Tour trams are equipped with a t-coil compatible hearing loop. Headsets are available at the Visitor Center for those without t-coils. Assistive Listening Devices (headsets and t-coil compatible neck loops) are available for all tours and programs upon request. Ask a staff member for assistance.

For more information see the audio guide list at the end of this document.

The New York Public Library

845-353-1313

Theatre has audio loop.

Please note that there are other NYC venues with assistive listening systems that are either FM or infrared. These require use of either a headset or a neck loop. The venues listed above have hearing loops so that those who wear hearing aids/cochlear implants with a t-coil need only turn on the t-coil program to access the sound; no other accessories are necessary. Some venues also provide headphones for those who do not have t-coils, but still want to take advantage of the hearing loop. For more information, please contact the individual venue.

We have only included venues that are currently open to the public.

List of venues in the New York Metropolitan Area that have audio tours or other services which are t-coil compatible.

All visitors, regardless of hearing ability, who want to hear the audio tours in these museums must get the audio guide. Visitors wearing hearing aids with a t-coil or a cochlear implant can hear the program by requesting a neck loop for t-coil compatibility, in addition to the audio guide and then setting their hearing aids to the t-coil setting.

New York City

Manhattan

Public Facilities

Ellis Island Museum

Ellis Island

New York, NY 10004-1467

212-363-3200

<http://www.nps.gov/elis/index.htm>

A personal hearing loop can be used on the ranger walks, but not inside the museum. It may be borrowed at the Information Desk; picture ID must be left in order to borrow the hearing loop.

The Frick Collection

1 East 70th Street

New York, NY 10021

212-288-0700

<http://frick.org/information/access.htm>

T-coil compatible audio guides are available at the audio guide desk at the entrance. They can also be used throughout the collection to hear recorded information about specific items, at the user's discretion. The system provides information in any of the following languages: English, French, German, Italian, Japanese and Spanish.

Guggenheim Museum

1071 Fifth Avenue at 89th Street

New York, NY 10128-0173

212-423-3500

www.guggenheim.org

The Guggenheim App covers special exhibitions, selections from the permanent collection, and the architecture of the building. The app has transcripts of all tour stops and is T-coil compatible. Please ask the staff at the Multimedia Guide desk for assistance. Please note that no devices will be distributed after 5:15 pm.

Intrepid Sea, Air and Space Museum

One Intrepid Square
Pier 86, Twelfth Avenue and West 46th Street
